The Effectiveness of Using Concept Mapping on Students' Achievement in Environmental Education Course and their Attitudes towards it at Al- Zaytoonah University of Jordan

Abstract:

This study aimed at investigating the effectiveness of using concept mapping on students' achievement the "Environmental Education Course and their Attitudes towards it at Al- Zaytoonah University of Jordan." The study sample consisted of two groups: the experimental group (n=35) which was taught by concept mapping, and the control group (n=34) which was taught by the traditional method. To achieve the objective of the study, the researcher developed an achievement test and attitudes question naire. The results have shown that there was a statistically significant difference $(\alpha \le 0.05)$ on students' achievement and their attitudes towards the "Environmental Education" course attributed to the teaching strategy in favor of the concept mapping. The study recommended that concept mapping be used at university as an instructional strategy.

Keywords: Concept Mapping, Students' Achievement and Attitudes, Environmental Education.
