Name: Dr. Amer Mansour Dababneh

E-mail	dababneh.amer@zuj.edu.jo
Phone	00962 – 6 – 4291511 Ext. 380
Fax Number	00962 – 6 – 4291432
Faculty	Faculty of Science and Information Technology
Department	Mathematics
Academic Rank	Assistant Professor
Year Rank Obtained	2004
Specialization	Applied Mathematics
Research Interest	Applied Mathematics, Ordinary Differential Equation, Partial Differential Equation.
Ph.D.	Belarussian National Academy of Sciences. Minsk – Belarus
Publications	*1. Dababneh A., Podlipenko Yu.K*. Minimax estimation of right-hand sides of elliptic partial differential equations with discontinuous coefficients under incomplete data. //Journal of Computational and Applied Mathematics, No *2. Dababneh A., Podlipenko Yu.K*. Minimax estimation of solutions of filtration problems in multilayered mediums under incomplete data. // Journal of Computational and Applied Mathematics, No *3. Podlipenko Yu.K.. . Dababneh A* Minimax estimation of solutions of transmission problems for elliptic equations under absence of information about conjugation conditions. //journal of Automation and Information Sciences. 2000, *4. Dababneh A.* Minimax estimation of solutions of transmission problems for elliptic equations under incomplete data // Bulletin of the University of Kiev . Series: Physics and *5. Dababneh A*. Minimax estimation of solutions to elliptic boundary value problems with discontinuous coefficients. // abstracts of fifth Crimean International mathematical school Method of Lyapounov functions ,Crimea, Alushta -

	September 5-13,2000.-p.65
	6. *Dababneh A*. Minimax estimation of right-hand sides of the second order elliptic partial differential equations with discontinuous coefficients under incomplete data. //abstract of the international conference Modeling and
	7. *Dababneh A. ., Podlipenko Yu.K.* Minimax estimation of solutions to boundary value problems of transmission for elliptic equations from point observations // //abstract of the international conference prediction and
	8. *Dababneh A.* Minimax estimation of solutions right-hand sides of elliptic equations with discontinuous coefficients under incomplete data. // abstract of the international research conference Actual Belarussian State university of transport, Gomel,2001.-
	9. *Zraiqat A., Dababneh A.* Study of Development of Cracks under Compressive Stresses. // Applied Mathematical Sciences, Vol.7,2013, no.33,1611-1622. HIKARI Ltd, www.m-hikari.com.
