

INDEX

- 7Q10 14
- Acetogenesis 204
- Acid Rainfall 10, 11
- Acidity 71, 72
- Activate Sludge Modifications 100–101
- Activated Sludge Systems 98–104
- ADP-ATP chain 203
- agglomeration 255
- Alkalinity 71, 72
- aluminum sulfate 261–262
- Ammonia Removal - Ion Exchange 185
- Ammonia Removal Mixed Media 189
- Ammonia Removal Stripping 183
- Ammonia Toxicity 175
- Anaerobic Digester Model ADM1 210
- Anaerobic Pretreatment 206–208
- Anaerobic Reactions 205
- Anaerobic Sludge Digestion 208
- Anaerobic Treatment 203–210
- Analytical Methods 8
- API separator 263
- Arsenic Cost Benefit Analysis 30
- ASM1 102
- Bardenpho Process 181, 196
- Belt Filter Press 108, 146–148
- Bernouli Equation 47
- Biochemical Oxygen Demand - Oxygen Depletion 39
- Biochemical Oxygen Demand Test 27
- Biological Process Modeling 109–122
- BIOWIN 114
- Bromine 167
- C:N:P Ratio 92
- Cadmium Precipitation 84
- Calcium Carbonate Equivalents Table 79

- Carbon Adsorption 231–236
 - Carbon Adsorption Breakthrough Curves 231, 232
 - Carbon Adsorption Coefficients 235–236
 - Carbon Adsorption Economics 233
 - Carbon Regeneration 233
- Carbonate Chemistry 71–77
- cations 261
- Chemical Oxygen Demand Test 28
- Chemical treatment 255
- Chloramines 156
- Chlorination, Breakpoint 159
- Chlorine 155
 - Chlorine Dioxide 161
 - Chlorine Safety 160
- Chlorinity 2
- Chromium Reduction 81, 84
- Circular Sewers, Flow
 - Characteristics 48
 - Clarifier Capital Costs 219
 - Clarifier Density Currents 130
 - Clarifier Design 124–127
 - Clarifier Hydraulic Detention Time 126
 - Clarifier sizing for Activated Sludge 106
 - Clarifier Surface Loading Rate 126
- Clarifiers 124–127
- Coagulation 255, 256, 259
- Coliform Standard 21
- colloids 255, 256
- Concentrated Animal Feeding Operations (CAFO) 192
- Current Meter (Gurley) 55

- Dalton 212
- daphnia magna* 38
- Denitrification, microbial 174
- Diatomaceous Earth 142
- Digestion, Mesophillic 204
- Digestion, Thermophillic 204
- Disinfection 149–171
 - Disinfection - Chick's Law 150
 - Disinfection - Rate of Kill 150
- Dissolved Air Flotation (DAF) 243–253
 - Dissolved Air Flotation Performance 244
 - Dissolved Air Flotation System Data Ranges 247
 - Dissolved Air Flotation System Operating Parameters 244–246
 - Dissolved Air Flotation System Theory and Design 246–247
 - Dissolved Air Flotation, Example 5
- Drinking Water Guidelines, World Health Organization 32
- Drinking Water Standards US and International 29

- e. coli* 151
- Effluent Toxicity Testing 37
- Electrocoagulation 251
- Electrolytic Flotation 248–251
 - Electrolytic Flotation Theory and Design 249–251
- emulsions, chemical, physical 261
- Entrapped Water 124

- ferric chloride 261–2
- Filter Backwashing 139
- Filter Body Feed 141, 142
- Filter Cloth, Permeability Rating 143
- Filter Head Losses 136
