Brief description

This course is a continuation of (Intermediate Accounting 1). It covers the accounting for property, plant and equipment (PPE) in terms of acquisition, depreciation, impairment, depletion and disposition. In addition, this course covers the accounting of intangible assets, their valuation, amortization and impairment. Also, the course covers the accounting treatment for long-term liabilities such as bonds and notes payable. Finally, the course covers the accounting for short-term liabilities such as contingencies.

Learning resources

Course learning outcomes (S= Skills, C= Competences K= Knowledge,)

No.	Course learning outcomes	The associated program learning output code
Knowledge		
K1	Discuss the acquisition and disposition of PPE	MK1, MK2
K2	Describe the different method of depreciation, impairment, and mineral resources depletion	MK1, MK2
K3	Discuss the various types of intangible assets, their values, amortization, and impairment	MK1, MK2
K4	Describe long-term liabilities, such as bonds payable and long-term notes payable	MK1, MK2
K5	Explain the accounting for contingency losses	MK1, MK2
Skills		
S1	Calculate the value of PPE acquisition and disposition	MS1
S2	Calculate the value of PPE depreciation and impairment, in addition to mineral resources depletion	MS1
S3	Apply the effective interest method for bonds payable	MS2
Competences		
C1		
C2

Brief description

This course introduces the advanced accounting concepts and practices underlying business combinations and consolidated financial statements according to the international accounting standards. It will cover the following issues; the different legal forms of business combinations, the use of the purchase method to account for acquisitions, the different available accounting treatments for investments in subsidiaries including the cost method, the partial equity method and the complete equity method. The course will explain the basic consolidation procedures for the financial statements of the parent and its subsidiaries, and the accounting treatment for some intercompany transactions such as Inventory and properties sales, bonds and intercompany leasing.

Brief description

The course provides students with the fundamentals of Managerial accounting; it makes a clear distinction between Cost and managerial accounting topics. It covers cost classification, flow, and estimation. It also covers the use of accounting information in planning and control decisions; such as cost-volume-profit analysis, comprehensive budgeting, relevant and irrelevant costs in nonrecurring decisions; responsibility accounting, and performance evaluation.

Brief description

The course provides students with a basic understanding of accounting information systems (AIS). In particular, the course addresses the following areas: database concepts, technology of accounting information systems. Use of systems technology, accounting information systems application, and management use of AIS. Further, the course uses the cycle-based approach in studying and designing accounting information system

Learning resources

Course book information (Title, author, date of issue, publisher ... etc)	Romney, M. Steinbart, P, Accounting Information Systems, 13th edition, 2015, New Jersey, Pearson Education, USA.			
Supportive learning resources (Books, databases, periodicals, software, applications, others)	1- Gerorge Bonder, and Williams Hopwood, Accounting Information Systems, 11th Edition, Pearson Education, 2012. 2- Katherine Smith & Others, Microsoft Excel for Accounting: Auditing & Accounting Information Systems, Pearson Education, 2003.

Course learning outcomes (S= Skills, C= Competences K= Knowledge,)

No.	Course learning outcomes	The associated program learning output code
Knowledge		
K1	Explain the basic components of AIS (paper and computerized based systems)	MK1
K2	Have a basic knowledge about give-get exchange by using 5 accounting cycles	MK2
K3	Describe the components of data processing cycle (input, process, storage and output)	MK3
K4	Explain the fundamental definitions of relational database	MK4
K5	Describe the types of cardinalities between entities and explain the basic requirements of REA diagram	MK5
Skills		
S1	Apply using MS Access to answer the four types of inquiries	MS1
S2	Able to build integrated REA data model for different companies strategies	MS2
S3	Able to prepare the tables linked to build basic relational database	MS1
S4	Apply using MS excel to complete simple accounting transaction file and Master file for A/R and A/P	MS2
Competences		
C1	Effective and strong communication within the work team to reach solutions that contribute to the advancement of AIS	MC1
C2	The ability to professionally lead the sets of steps to build basic database for simple accounting records	MC2

Mechanisms for direct evaluation of learning outcomes

Brief description

This course qualifies the students for all considered accounting skills and applied accounting information systems plus that the students in this course are being learned how to use the accounting concepts and other sciences concepts in the research. This course deals with a specific major topic in accounting, approved by the Department, and changes happened in each new semester. It gives the students the opportunities to search and write in aspects related to that topic in order to enhance the accounting skills and update their information according to the new topics and issues in the accounting fields. Each student might select a related aspect, and he or she has to present and discuss his/her work with his/her colleagues in the class.

Learning resources
