" عراقة وجودة" "Tradition and Quality"

Brief course description- Course Plan Development and Updating Procedures\ Mathematics Department	QF01/0409-3.0E

Faculty	Sciences and Information Technology	Academic Department	Mathematics	Number of the course plan
Number of Major requirement courses	15	Date of plan approval		(2021-2022)

Course number	Credit hours	Title of the course	Prerequisite-co-requisite	
0101711	3	Real Analysis None		
Outer measure, me	Outer measure, measurable sets and Lebesgue measure. Measurable functions. Lebesgue integral, integral of a			
nonnegative function, general Lebesgue integral, convergence in measure. Differentiation and integration,				
differentiation of monotone functions. The L ^P spaces, Holder and Minkowski inequalities.				
Course number Credit hours Title of the course Pr		Prerequisite-co-requisite		
0101712	3	Functional Analysis	None	

Metric spaces, compact sets in metric spaces, normed spaces, finite dimensional normed spaces, complete and separable normed spaces, Banach spaces. Inner product spaces, Hilbert spaces, orthogonal and orthonormal system, separable Hilbert spaces, and Parseval's equality, Riesz representation for linear functionals. Linear operators, bounded linear operators, continuity linear operators, algebraic dual, Hahn-Banach theorems.

Course number	Credit hours	Title of the course	Prerequisite-co-requisite
0101713	3	Complex Analysis	0101711

Analytic functions, power series, Laurent series, Mobius transformations, complex integration, Cauchy's theorem and formula, the maximum modulus principle, Schwartz lemma, singularities and classification of singularities, Riemann mapping theorem, Schwartz-Christofell formulas, harmonic functions, Dirichlet problem, Poisson's formula.

Course number	Credit hours	Title of the course	Prerequisite-co-requisite
0101714	3	Mathematical Optimization	None
Linear programmi	ng and matham	estical modeling the simpley method duality	conveyity constrained and

Linear programming and mathematical modeling, the simplex method, duality, convexity, constrained and unconstrained nonlinear programming problems, Lagrange multipliers, Kuhn-Tucker conditions, quadratic programming.

Course number	Credit hours	Title of the course	Prerequisite-co-requisite
0101721	3	Abstract Algebra (1)	None

Isomorphism theorems of groups, group automorphism, finite direct products, finitely generated groups, groups actions, Sylow theorems, rings and ideals, prime and maximal ideals, polynomial rings and irreducibity tests, unique factorization domains, Euclidean domains.

Course number	Credit hours	Title of the course	Prerequisite-co-requisite
0101722	3	Abstract Algebra (2)	0101721

Rings and ideals, nilpotents and idempotents in rings, R-modules, products and sums of R-modules, exact sequences and split exact sequences, simple and semisimple R-modules, essential and small submodules, the ring of endomorphisms of an R-modules, projective and injective modules, regular rings, the radical and the socle of an R-module, Noetherian and Artinian R-modules.

Course number	Credit hours	Title of the course	Prerequisite-co-requisite
0101731	3	Topology (1)	None

Topological spaces, neighborhoods, bases and subbases, continuous functions, product spaces, weak topologies, quotient spaces, filters, separation axioms, regular and completely regular spaces, normal and perfectly normal spaces, Lindelof, separable spaces and second countable spaces, compact spaces, locally compact spaces, sequentially and countably compact spaces, one point compactification, paracompact spaces, connected spaces.

Course number	Credit hours	Title of the course	Prerequisite-co-requisite
0101732	3	Topology (2)	0101731

جامعة الزيتونسة الأردنية Al-Zaytoonah University of Jordan كلية العلوم وتكنولوجيا المعلومات Faculty of Sciences and Information Technology

" عراقة وجودة" "Tradition and Quality"

Brief course description- Course Plan Development and Updating Procedures\ Mathematics Department	QF01/0409-3.0E

	Locally compact and K-Spaces, Cech complete spaces, metric and metrizable spaces, complete metric spaces and				
the completion theorem, Baire spaces and Baire category theorem, uniform and proximity spaces. Course number Credit hours Title of the course Prerequisite-co-requisite					
Course number	Credit hours	Title of the course		Prerequi	_
0101741	3	Applied Mathematics (1)	1	1	None
		iniqueness of solutions for ODEs, integ	gral transfo	orms, and	Green's function,
		ODEs and their stability.			
Course number	Credit hours	Title of the course			site-co-requisite
0101742	3	Applied Mathematics (2)			0101741
		separation of variables, transform m	nethods, e	igen func	tion expansions,
		methods, integral equations.			
Course number	Credit hours	Title of the course		Prerequi	site-co-requisite
0101744	3	Advanced Numerical Analysi			None
		ation, least squares method), numeric			
		inge-Kutta formulas, boundary value			
	_	olesky, QR and singular value decomp	positions),	eigenvalue	e problem (power
method, Lanczos al	gorithm).				
Course number	Credit hours	Title of the course		Prerequi	site-co-requisite
0101751	3	Mathematical Statistics		None	
Univariate and mu	ltivariate distrib	oution theory, sufficient statistics, minir	mal suffici	ent statisti	cs, completeness,
methods of point es	stimation and pr	operties of point estimators, confidence,	, intervals,	testing hy	potheses, Neman-
Pearson lemma, ran	domized tests,	uniformly most powerful test, likelihood	l ratio tests	, minimax	methods.
Course number	Credit hours	Title of the course		Prerequi	site-co-requisite
0101752	3	Probability Theory			None
Kolmogorrov's axio	oms, random va	riables, distributions, expected values,	conditiona	l probabili	ty, independence,
		tic functions and inversion formula,	convergen	ce concep	ts, laws of large
numbers, central lir	nit theorems.				
Course number	Credit hours	Title of the course		Prerequi	site-co-requisite
0101771	3	Selected Topics in Mathemati	ics		None
Study of selected an	reas in mathema	tics. Designed for special needs of advan	nced stude	nts.	
Course number	Credit hours	Title of the course		Prerequi	site-co-requisite
0101772	3	Scientific Research Methodology None		None	
The course aims to	provide in-de	oth knowledge of research design and	methodolo	ogy and tra	ain the student in
writing a study plan and critically reviewing scientific literature.					
Approved by department council Date of approval 2021/8/12
