How to Become a Software Engineer ?

- * High School Preparation
- * College Curriculum
 - Plan on getting a degree
 - Qualify your degree by what you want to do
- * Extra College Curriculum
 - Supplement your class work with personal research
 - Unless you're planning to get your foot in the door through an intern position, try to find side projects while in school
 - Develop contacts with software engineers

From Software Engineers to all business people

“quality and tranquility in software engineering”; a series of posts
