

## Football activity

The College of Nursing held its own football tournament, and this came after preparing and distributing the questionnaire Special electronically, and announced on the bulletin board in order to register to participate in the tournament, where the students of the College of Nursing played in a high sportsmanship on the outdoor field inside the university campus. This came under the supervision of one of the members of the Activities Committee, Dr. Majdi Al-Zoubi, where He managed the match and the players while they were playing and urged the students to continue providing various activities within the college, which increases the students' effectiveness in various sporting activities. He gained Players have experience and coordination among themselves. This tournament will be a college team formation station Nursing, who will compete in the college football championship at the university later.

## About the first aid activity in Queen Noor Park

A person may face difficult circumstances and situations that impose themselves suddenly and without warning, and when a person has the knowledge and knowledge of how to act in such circumstances and situations, this may save a person's life. That life. That is priceless

The College of Nursing, in cooperation with a number of community nursing students, organized it under the supervision of Eng. Ahlam Fakhouri gave a lecture on the basics of first aid in Queen Noor Park - Northern Hashemi, where the lecture targeted residents of the area and workers in the park.

Preparations for this activity were made by preparing the first aid bag with all the necessary tools and supplies in emergency cases, and this lecture was announced to the residents of the area earlier.

The students presented the concept of first aid and providing initial treatment to the injured person, which contributes to saving his life, until he arrives at the hospital and his health condition is monitored.

The lecture focused on many topics that require first aid, such as sunstroke, nosebleeds, fainting, burns, wounds, in addition to how to perform cardiopulmonary resuscitation.

This awareness lecture aimed to provide skills in public safety.(Basic Life Support  
General rules for first aid.

And M showed. Ahlam Fakhoury: It is necessary to be calm and possess scientific health knowledge when providing first aid to those who need it, and to avoid stress or haste in providing first aid methods that may give negative results that are reflected in the health of the injured person instead of contributing to alleviating his condition.

## **Elderly activity**

The College of Nursing was held at Al-Zaytoonah University of Jordan

A special entertainment day for the elderly in the White Family (the nursing home) in the Zubaidiyah area

This is in cooperation with community nursing students from the College of Nursing, where they prepared several entertainment activities for the elderly in order to entertain themselves, as these activities included the human, psychological and social aspects.

The elderly participated in these activities with a smile on their faces while drawing and playing with the students.

The Faculty of Nursing at Al-Zaytoonah University of Jordan was thanked in appreciation of their efforts for their activities with the elderly, as it was a special day for them.

## **Conferences and scientific achievements**

Scientific research is considered one of the basic pillars for the advancement of the College of Nursing and improving the performance of faculty members. Faculty members at the College of Nursing conduct many applied scientific research in several health fields according to their desires and specializations, as the college has five research teams that have common research interests. In addition, researchers from the College of Nursing have opportunities to obtain scientific research support at the expense of the university's scientific research budget, and many faculty members have received financial support to carry out this research.

With regard to conferences and scientific days, the Faculty of Nursing at Al-Zaytoonah University of Jordan held a total of eleven scientific days and three international conferences. In order to pay attention to student achievements in nursing at the Kingdom level, the College of Nursing held a... 2018: A total of six creative forums in which nursing colleges across the Kingdom present the student achievements that have been achieved and are being held. Presenting these achievements to a jury, so that the winners receive numerous prizes.

Among the scientific achievements is that faculty members won awards at the level of the Arab world and at the international level, and also one of the master's students won the award for the best master's thesis at the college level, and Dr. Louay Abu Shahrour received the award honoring professors for outstanding work for the year (2019) and the "Nabad" group of students from the College of Nursing won second place in the Best Awards Creative work for students of Arab nursing colleges for the year (2019). Student Rawan Al-Anouz also won the award for best scientific research in Amman Security Competition, organized by the Arab Institute for Security Studies for the year 2021.

## **Academic courses**

The Faculty of Nursing at Al-Zaytoonah University of Jordan, in cooperation with the "Heart Community" Hussein Cancer Foundation, organized training workshops entitled "save training for nursing students" for students of the Faculty of Nursing and clinical training supervisors, under the supervision and organization of Dr. Magdy Moussa. Al-Zoubi, in the presence of the Dean of the College of Nursing, Professor Dr. Khaled Suleiman

Dr. Khaled stated that the importance of this workshop is to train students in cardiopulmonary resuscitation, breathing, and first aid techniques, as the cardiopulmonary resuscitation center at the King Hussein Cancer Center is considered the first training center in Jordan and holds training courses (AHA) that are accredited by the American Heart Association. High quality.

He explained that the workshop aims to train and qualify students and deal with critical cases and the necessity of mastering the steps of performing cardiopulmonary resuscitation, which is an emergency first aid operation performed by a paramedic in an attempt to maintain healthy brain functions while restoring blood circulation and breathing to save people's lives. Until the ambulance team arrives

The workshop included the students applying pulmonary resuscitation under the supervision of trainers and specialists from the Al Hussein Foundation
