Study plan No.	2021/2022		University Specialization		Artificial Intelligence	
Course No.	0142231		Course name		Principles of Artificial Intelligence	
Credit Hours	3		Prerequisite Co-requisite		Introduction to Information Technology	
Course type	<input type="checkbox"/> MANDATORY UNIVERSITY REQUIREMENT	<input type="checkbox"/> UNIVERSITY ELECTIVE REQUIREMENTS	<input type="checkbox"/> FACULTY MANDATORY REQUIREMENT	<input type="checkbox"/> Support course family requirements	<input type="checkbox"/> Mandatory requirements	<input checked="" type="checkbox"/> Elective requirements
Teaching style	<input type="checkbox"/> Full online learning		<input type="checkbox"/> Blended learning		Traditional learning	
Teaching model	<input type="checkbox"/> 2Synchronous: 1asynchronous		<input type="checkbox"/> 2 face to face : 1synchronous		3 Traditional	

**Faculty member and study divisions information (to be filled in each semester by the subject instructor)**

Name	Academic rank	Office No.	Phone No.	E-mail	
Division number	Time	Place	Number of students	Teaching style	Approved model

**Brief description**

This course aims to give an introduction to artificial intelligence, symbolic logic and its uses in knowledge representation, control methods, discretionary research methods, and applications of artificial intelligence (expert systems, natural language processing, robotics...). Introduction to Neural Networks, Genetic Algorithm, and Introduction to Machine Learning.

**Learning resources**

Course book information (Title, author, date of issue, publisher ... etc)	<ol style="list-style-type: none"> <li>George F. Luger. Artificial Intelligence: Structures and Strategies for Complex Problem Solving: Addison-Wesley, latest edition. ISBN 0-201-64866-0</li> <li>Artificial Intelligence: Building Intelligent Systems. (1st edition) by P. Kulkarni and P. Joshi, PHI Learning Private Limited, 2015. ISBN: 978-81-203-5046-5</li> </ol>
Supportive learning resources (Books, databases, periodicals, software, applications, others)	<ol style="list-style-type: none"> <li>Russell and Norvig, Artificial Intelligence: A Modern Approach, 3rd edition, Pearson Education, Inc., Prentice-Hall-Series, 2010.</li> <li>Jeff Heaton, Artificial Intelligence for Humans, Volume.1,</li> </ol>

Course learning outcomes (S= Skills, C= Competences K= Knowledge,)

No.	Course learning outcomes	The associated program learning output code
<b>Knowledge</b>		
K1	1. Identify and apply knowledge representation formalisms with emphasis on propositional and predicate calculus but also with conceptual graphs, including representation of uncertainty	MK1
K2	2. Analyse problems as state space graphs, and apply heuristic state space searches including planning using Prolog or Lisp.	MK2
K3	3.1 Understanding the concepts of production systems. 3.2 Learning the main components of production systems.	MK3
K4	4.1 Learning the concepts of PROLOG language. 4.2 Learning the statements, rules and queries of Prolog language.	MK4
K5	5.1 Learning the concepts of expert systems and applications. 5.2 Learning the concepts of Knowledge Based Systems. 5.3 Learning the concepts of machine learning.	MK5
K6	6. Evaluate a state space search algorithm in terms of admissibility, monotonicity, and informedness.	MK6
K7	7. Analyze and evaluate expert systems.	MK7
K8	8. Identify learning techniques: symbol based (supervised and unsupervised), reinforcement, neural networks, and genetic algorithms	MK8
K9	9. Analyse the main approaches to natural language processing	MK9
<b>Skills</b>		
S1	<b>Knowledge and its application.</b> Demonstrate and apply critical understanding of the artificial intelligence (AI) principles.	MS1
S2	<b>Research skills.</b> Gain skills how to synthesize and apply theoretical knowledge of AI.	MS2

QF01/0408-4.0E	Course Plan for Bachelor program - Study Plan Development and Updating Procedures/ Artificial Intelligence Department
----------------	--

S3	<b>Special abilities.</b> Be able to analyze the organizational capability to innovate and provide recommendations from an AI perspective.	MS3
S4	<b>Social abilities.</b> Adhere to the principles of professional ethics and citizenship participating in discussions on relevant academic issues. Be able to lead the team and be accountable for its performance.	MS4
S5	<b>Personal abilities.</b> Develop personal and professional abilities, critical thinking, and creativity.	MS5
<b>Competences</b>		
C1	Use programming languages	MC1
C2	Solve computer problems with Math	MC2
C3	Exploit the principle of object-oriented programming	MC3
C4	Develop transactional web applications	MC4
C5	Develop game or simulation applications	MC5

#### Mechanisms for direct evaluation of learning outcomes

Type of assessment / learning style	Fully electronic learning	Blended learning	Traditional Learning (Theory Learning)	Traditional Learning (Practical Learning)
First exam				
Second / midterm exam			%30	
Participation / practical applications			20	
Asynchronous interactive activities			0	
final exam			%50	

**Note:** Asynchronous interactive activities are activities, tasks, projects, assignments, research, studies, projects, work within student groups ... etc, which the student carries out on his own, through the virtual platform without a direct encounter with the subject teacher.

#### Schedule of simultaneous / face-to-face encounters and their topics

Week	Subject	learning style*	Reference **
