|                   |                     |            |                    |                       |                |

### Brief description

|  |
|--|
| This course introduces students to programming technologies, design and development related to mobile applications. Topics include, Introducing Flutter, Learning Dart Basics, Using Common Widgets, Writing Platform-Native Code, Saving Data With Local Persistence and, Adding the Firebase And The Firestore Client App. Upon completion, students should be able to create basic applications for mobile devices. |
|--|

### Learning resources

|   |   |                               |   |                                 |  |
|---|---|-------------------------------|---|---------------------------------|--|
| Course book information (Title, author, date of issue, publisher ... etc)                     | Beginning Flutter : A Hands On Guide To App Development, Marco L. Napoli, 2020, John Wiley & Sons   |                               |   |                                 |  |
| Supportive learning resources (Books, databases, periodicals, software, applications, others) | 1. Beginning App Development with Flutter: Create Cross-Platform Mobile Apps, Rap Payne, 2019, Kindle.<br>2. Flutter.dev (The main Web Site for all Flutter resources). |                               |   |                                 |  |
| Supporting websites   | 1. <a href="https://youtube.com/">https://youtube.com/</a>  |                               |   |                                 |  |
| The physical environment for teaching   | <input checked="" type="checkbox"/> Class room  | <input type="checkbox"/> labs | <input type="checkbox"/> Virtual educational platform | <input type="checkbox"/> Others |  |
| Necessary equipment and software  | Android Studio or VS Code software  |                               |   |                                 |  |
| Supporting people with special needs  | -----   |                               |   |                                 |  |
| For technical support   | -----   |                               |   |                                 |  |

### Course learning outcomes (S= Skills, C= Competences K= Knowledge,)

| No.                | Course learning outcomes  | The associated program learning output code |
|--------------------|---|---|
| <b>Knowledge</b>   |   |   |
| <b>K1</b>          | The knowledge of software development fundamentals, including data structures, algorithms, complexity, multiple programming languages, paradigms, and technologies. | MK4   |
| <b>Skills</b>      |   |   |
| <b>S1</b>          | An ability to use the techniques, skills, and modern tools necessary for software engineering practice.   | MS3   |
| <b>Competences</b> |   |   |
| <b>C1</b>          | Ability to develop software systems in one or more significant application domains.   | MC2   |

### Mechanisms for direct evaluation of learning outcomes

| Type of assessment / learning style    | Fully electronic learning | Blended learning | Traditional Learning (Theory Learning) | Traditional Learning (Practical Learning) |
|--|---------------------------|------------------|--|---|
| Midterm exam                           | 30%                       | 30%              | 40%                                    | 30%                                       |
| Participation / practical applications | 0                         | 0                | 10%                                    | 30%                                       |
| Asynchronous interactive activities    | 30%                       | 30%              | 0                                      | 0   |
| Final exam                             | 40%                       | 40%              | 50%                                    | 40%                                       |

**Note:** Asynchronous interactive activities are activities, tasks, projects, assignments, research, studies, projects, work within student groups ... etc, which the student carries out on his own, through the virtual platform without a direct encounter with the subject teacher.

### Schedule of simultaneous / face-to-face encounters and their topics

| Week | Subject                                 | learning style*                    | Reference ** |
|------|---|------------------------------------|--------------|
| 1    | Introducing Flutter and Getting Started | Lecture/ learning through projects | 3-25         |
| 2    | Creating a Hello World App              | Lecture/ learning through projects | 25-43        |
| 3    | Learning Dart Basics                    | Lecture/ learning through projects | 43-65        |
| 4    | Creating a Starter Project Template     | Lecture/ learning through          | 65-77        |

|                |  |
|----------------|--|
| QF01/0408-4.0E | Course Plan for Bachelor program - Study Plan Development and Updating Procedures/<br>Department |
|----------------|--|

|    |   | projects                           |         |
|----|---|------------------------------------|---------|
| 5  | Understanding the Widget Tree                       | Lecture/ learning through projects | 77-103  |
| 6  | Using Common Widgets                                | Lecture/ learning through projects | 103-151 |
| 7  | Adding Animation to An App                          | Lecture/ learning through projects | 151-177 |
| 8  | Creating An App's Navigation                        | Lecture/ learning through projects | 177-221 |
| 9  | Creating Scrolling Lists and Effects                | Lecture/ learning through projects | 221-253 |
| 10 | Building Layouts                                    | Lecture/ learning through projects | 253-267 |
| 11 | Applying Interactivity                              | Lecture/ learning through projects | 267-307 |
| 12 | Writing Platform-Native Code                        | Lecture/ learning through projects | 307-327 |
| 13 | Saving Data With Local Persistence                  | Lecture/ learning through projects | 327-375 |
| 14 | Adding the Firebase And The Firestore Client App    | Lecture/ learning through projects | 375-411 |
| 15 | Adding State Management to The Firestore Client App | Lecture/ learning through projects | 411-453 |
| 16 | Final Exam  |                                    |         |

\* Learning styles: Lecture, flipped learning, learning through projects, learning through problem solving, participatory learning ... etc.

\*\* Reference: Pages in a book, database, recorded lecture, content on the e-learning platform, video, website ... etc.

### Schedule of asynchronous interactive activities (in the case of e-learning and blended learning)

| Week | Task / activity | Reference | Expected results |
|------|-----------------|-----------|------------------|
| 1    |                 |           |                  |
| 2    |                 |           |                  |
| 3    |                 |           |                  |
| 4    |                 |           |                  |
| 5    |                 |           |                  |
| 6    |                 |           |                  |
| 7    |                 |           |                  |
| 8    |                 |           |                  |
| 9    |                 |           |                  |
| 10   |                 |           |                  |
| 11   |                 |           |                  |
| 12   |                 |           |                  |
| 13   |                 |           |                  |
| 14   |                 |           |                  |
| 15   |                 |           |                  |
| 16   |                 |           |                  |
