I					

Brief description

An overview of data structure concepts, arrays, stack, queues, trees, and graphs. Discussion of various implementations of these data objects, programming styles, and run-time representations. Course also examines algorithms for sorting, searching and some graph algorithms. Algorithm analysis and efficient code design is discussed.

Learning resources

Department

Course learning outcomes (S = Skills, C= Competences K= Knowledge,)

NI.	C	The associated program
No.	Course learning outcomes	
		learning output code
	Knowledge	
K1	Explain and utilize linked lists, stacks, queues, trees and graph.	MK4
K2	Describe the techniques of algorithm analysis.	MK4
К3	Discuss the advantages and disadvantages of various algorithms	MK4
K4	Incorporate algorithmic design know-how and data structures to create reliable and structured programs.	MK4
K5	Describe the design and performance of various searching and sorting algorithms	MK4
	Skills	
S1	Ability to develop algorithms for manipulating stacks, queues,	MS4
	linked lists,.etc	
S2	Ability to identify a problem and analyze it in terms of its	MS4
	significant parts and the information needed to solve it.	
S3	Familiarize the student with the issues of time complexity and	MS4
	examine various algorithms from this perspective.	
S5	Familiarize the student with the issues of time complexity and	MS4
	examine various algorithms from this perspective.	
	Competences	
C1	Ability to solve complex software problems	MC2
C2	Ability to participate in programming competitions	MC1

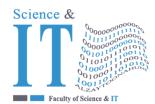

Mechanisms for direct evaluation of learning outcomes

Type of assessment / learning style	Fully electronic learning	Blended learning	Traditional Learning (Theory Learning)	Traditional Learning (Practical Learning)
Midterm exam	30%	30%	40%	30%
Participation / practical applications	0	0	10%	30%
Asynchronous interactive activities	30%	30%	0	0
Final exam	40%	40%	50%	40%

Note: Asynchronous interactive activities are activities, tasks, projects, assignments, research, studies, projects, work within student groups ... etc, which the student carries out on his own, through the virtual platform without a direct encounter with the subject teacher.

Schedule of simultaneous / face-to-face encounters and their topics

Week	Subject	learning style*	Reference **
