### **Abstract**

The mobile phone has become one of the modern tools and means which criminals commit many crimes. The mobile phone has become one of these technologies that has led to harm to individuals. The most dangerous is that the use of the mobile phone in crime is carried out remotely and it is easy to commit this crime because it has become the most popular in the hands of individuals and is available in it. Many services, such as internet services, have led to the commission of many. Crimes that are committed via the mobile phone and are of an electronic nature, "which increases the seriousness of this crime.

Through talking about the study, We were about what the mobile phone is, committed with it and the elements of the crime that occurs via the phones. We talked about the images of crimes committed via mobile phones, and we of findings reached a number and recommendations. The most prominent of which is that the crimes provisions contained in the communications law do not cover the crimes that are committed via mobile phones. The crimes of violating privacy, taking photos and recording calls have increased in prevalence through mobile phones as a result. Due to the development of electronic technology and the means available to commit this means crime. We also hope that Jordanian legislator will introduce legal texts related to the crime committed via the mobile phone and the necessity of the text and attention to the crimes of crimes related to public morals and the crimes of transmitting false news via the allocating a chapter on these Crimes .
